

**2007 started with a trip to Honduras with a 35-person team. Over 200 children and adults received dental care ranging from fillings, root canals, extractions and cleanings.**

**Our Bible club team presented the gospel to many children and also taught adult women to knit.**

**Construction of the Clinic started in September 2006. By November we had exhausted funds so the project was halted until additional funds were raised.**

## **July 2007 Update**

**Before the year was out, the additional funds to complete the building had come in.**

**In February two of our team had planned to complete the electrical and plumbing work while we were there, but because of the delay, the building was not ready for that. Now, the building is ready for the electrical and plumbing work and the current plan is to have our two technical guys go to Tegucigalpa in October to finish the work. The building should then be ready for our February dental trip.**

**Currently, we need to raise an additional \$19,000 to allow us to completely furnish the 10 stations in the clinic. This will include patient chairs, dentist chairs, assistant chairs and lights. We covet your prayers and if you would like to make a tax-deductible gift toward this current need, we would be grateful to our Lord who continues to bless us.**
